

INTERNATIONAL TRADE SOLUTIONS - ABERDEEN

DEALING WITH UK - EU EXIT

Dealing with post UK - EU exit brings many companies into new territory for dealing with customs and excise regulations.

On January 1st 2021, the UK will automatically drop out of the EU's main trading arrangements, meaning previous free trade will be subject to tariffs and customs checks applicable to all other UK exports and imports. With the knock on effects of additional checks, manufacturers will have delays in getting their goods to the end customer due to port congestions.

To help deal with this Sea-Cargo Aberdeen Ltd are offering a twofold solution with both a Temporary Storage Facility (TSF) and coming soon a new Customs Bonded Warehouse Facility centrally located in the port of Aberdeen. Guided by expert Sea-Cargo staff, we can ensure your company is able to comply with new customs regulations while ensuring your goods continue to flow.

	What is it?	Advantages
Temporary Storage Facility (TSF)	Offer a short term storage solution for goods imported into the UK until they are removed.	 Transfer imports from other busier UK ports to Aberdeen to avoid congestion delays Delay making a full customs declaration and paying duties and taxes until the end of the goods' agreed storage period
Customs Bonded Warehouse Facility	A bonded warehouse; a secure space where goods on a long term basis that would normally be liable for duty and VAT payments can be stored until they are removed from the facility.	 Improve cash flow by deferring duty and VAT payments until goods are sold or transferred. Improve supply through peak seasons by stock piling Only paying destination duty on exports thus avoid double duty payments.
