

THE SEA-CARGO GROUP: TOTAL LOGISTICS MADE EASY

Import/export pre-notification cost

Dear valued customer,

After the United Kingdom left the European Union in 2021, the customs regulation has changed. All cargo to and from UK now has to be pre-notified to the Norwegian Customs Authority. Sea-Cargo is obliged to report all import and export to the authorities, and we have for the last year been performing this without any extra cost for our customers.

We do however see that the administration needed for this reporting is comprehensive, and we will going forward offer this as an extra service to our customers. This charge will apply for all customers unless you can issue the notification yourself via NCTS. If you do arrange the pre-notification yourself, please contact us for an agreement.

From 1st March 2022 the new charges will be:

- NOK 480,- per notification, including three HS codes
- Excess HS codes: NOK 45,- (per code)
- The fee will be charged to the party paying the freight

We hope for your understanding, and you are welcome to contact us with any questions.
