

NOTICE TO CUSTOMERS - REVISED BAF

Date: 16th June 2026

Bunker prices fell over the past week amid optimism about a peace agreement between the US and Iran.

As a result, the BAF for week 26 will be lowered to **89%**, down 5% points from the previous week.

We will continue to closely monitor and assess developments in the fuel markets. Every effort will be made to mitigate the impact on our customers and to reduce bunker consumption wherever feasible. Updates will be sent each Tuesday for the upcoming week until further notice.

Thank you for your understanding and continued support.
