NOTICE TO CUSTOMERS – REVISED BAF

Date: 11th August 2026

Bunker prices fell as weaker demand, improved supply expectations, and easing geopolitical risk lowered crude oil prices. These lower crude costs outweighed Europe’s tight diesel market, pulling gasoil prices down.

As a result, the BAF for week 34 will be lowered to **96%**, down 5% points from the previous week.

We will continue to closely monitor and assess developments in the fuel markets. Every effort will be made to mitigate the impact on our customers and to reduce bunker consumption wherever feasible. Updates will be sent each Tuesday for the upcoming week until further notice.

Thank you for your understanding and continued support.
